

Artificial Cast Stone Rocks For Exhibits, Displays, Retail Props

Rocks and tree stumps are ideal for creating back-to-nature scenery for temporary or permanent retail store windows and displays, theater stage sets, exhibits and other uses, but finding, moving and installing real ones that weigh hundreds—if not thousands—of pounds is just not practical or affordable.

Now there's an alternative with our incredibly lifelike 50-60 lb. hollow artificial rock replicas molded from 800-1,000 lb. real boulders which look and feel natural and can withstand the rigors of retail traffic

and the inevitable touching of curious passersby because they're made from construction-grade cast stone (lighter weight and equally durable polyurethane models are also available).

They can be drop-shipped to single or multiple locations via FedEx Ground, usually within two weeks of being ordered (longer for larger quantity orders). Visit our website for more details:
