

Durable, Lightweight Fake Cover Rocks Are “A Natural” For Hiding, Concealing

When you need to hide an unsightly or bothersome septic lid, pump, utility box or other item in your yard or on your property, there’s nothing better for the job than our replica rocks molded from actual 800-1,500 lb. boulders and made from industrial-grade, durable polyurethane to withstand the elements and 300 lbs. of weight.

These incredibly lifelike hollow artificial rocks—available in a choice of three colors—look and feel natural due to the efforts of craftsmen with years of experience who are able to capture the natural beauty of real boulders in our molds so you can display them proudly as attractive landscape accents at your home.
